From: Matthew Winokur
Subject: ICAO airline position paper

We need a declarative document which states facts related to ETS on aircraft. Over the next year we face a major challenge to retain smoking on international as well as domestic routes. Isn't there a way this can be done and still respect Marty Warrens concerns. The fact is that industry people will be meeting with airline staff and airline regulatory agency officials. We need a fact sheet and therefrom a clear indication of our position.

PMI Corporate Affairs
Subject: ICAO airline position paper

Matt, per you request, I discussed the development of a leave behind paper or briefing notes on the airline issue with Mopsy. She had seen your original request and discussed this with Marty Warren. The 3 of us had a conference call Monday 9/28 on the idea and I was told that we couldn't do it as there are various problems (even with an anecdotal piece as you suggested). I was given various reasons which I will discuss with you over the phone when you get a chance to call. Other than this, I should have supplied you with the appropriate information to your various requests concerning ICAO that we discussed Monday.

Anne
